

Srihari Gopi

Associate Vice President, Global Workforce Optimization at Citi
Bengaluru, India

gsrihari1993@gmail.com LinkedIn (<https://www.linkedin.com/in/srihari-gopi/>)

Summary

Associate Vice President with 10+ years across analytics consulting, US fintech product management, credit risk modeling and AI-led workforce optimization at a global bank.

I built a seven-member automation team from zero and have delivered enterprise-scale reporting, lineage and scenario-planning systems that connect credit risk, product and operations. I trained at the University of Minnesota's Carlson School and worked in the US in credit risk and lending before moving back to India.

Experience

Apr 2025 – present

Associate Vice President, Global Workforce Optimization

Citi, Bengaluru, India

- Built and lead a seven-member low-code/no-code automation team from scratch. Delivered a multi-API platform handling 600+ transactions a day, so operations agents worldwide can self-serve overtime and voluntary time-off requests, agent logout and real-time skill updates.
- Lead an enterprise data mapping and lineage initiative covering 600+ long-term capacity plans across global sites and business functions. I own the process governance and its ongoing maintenance cycle.
- Core member of a Report Rationalization initiative that analyzed clients' end-to-end data and reporting landscape. Delivered a target-state architecture and a right-sized operating model in a six-week engagement, using stakeholder workshops and AI-assisted analysis of transcripts and report inventories.
- Lead a scenario-planning initiative on Xceptor, with maker-checker validation, that makes capacity planning governed and auditable at scale.

2021 – Dec 2024

Product Manager

Applied Data Finance, Chennai, India

- Drove loan originations and product development for a personal-loan acquisition product originating \$50M a month. Reworked the organic funnel UX and lifted customer acquisition by 20% in six months.
- Restructured the underwriting workflow to cut early risk exposure on newly originated loans by 35%.
- Launched a new affiliate partner through a co-branded campaign, and integrated a notary vendor that reached 100% compliance on suspect applications.

2020 – 2021

Risk Analyst

Funding Circle, San Francisco, USA

- Built an allocation model framework in Python and Django that routes prospective leads to lender partner groups, improving sales efficiency across the platform.
- Rebuilt and maintained a single source of truth for the \$1B loan portfolio, standardizing data definitions, ownership and governance.

2018 – 2020

Associate, Credit Risk Strategy and Modeling

LatentView Analytics, San Jose, USA

- Revised PayPal's monthly consumer credit-card portfolio risk model in Python with gradient boosting (H2O), raising eligible customer credit lines and improving charge-off estimates.

2017 – 2018

Analytics Consultant

Carlson Analytics Lab, Minneapolis, USA

- Won first place at MinneMUDAC 2017 by predicting high-cost diabetic patients with a random forest, as part of the University of Minnesota graduate analytics practicum.

2014 – 2017

Analyst, then Senior Analyst

LatentView Analytics, Chennai, India

- Led five analysts across pricing and FP&A projects for a Fortune 500 online-payments client.
- Helped integrate Xoom's pricing with the client's pricing structure, and built a Tableau pricing-scenario tool that simulates fee structures for large-merchant negotiations.
- Won the "Spirit of LatentView" award for a customer-engagement waterfall model.

Education

2017 – 2018

MS, Business Analytics

Carlson School of Management, University of Minnesota, Minneapolis, USA

2010 – 2014

B.Tech, Instrumentation and Control Engineering

National Institute of Technology, Trichy, India

Skills

Product and operations: Product management, workforce optimization, capacity planning, report rationalization, process automation

Risk and analytics: Credit risk modeling, gradient boosting (H2O), random forest, causal modeling, scenario planning

Data and engineering: Python, R, SQL (Teradata, MySQL), Django, data mapping and lineage, multi-API integration

Tools: Tableau, Power BI, MicroStrategy, Xceptor, low-code/no-code platforms

Leadership: Team building, stakeholder management, workshop facilitation, cross-functional delivery
